

# PRO Landscape Software

PRO Landscape allows landscape contractors, landscape designers, landscape architects, garden centers and other landscaping professionals to sell more jobs with stunning landscape plans and presentations. PRO Landscape has been the standard in landscape design software for landscape professionals for almost 20 years. The software features landscape photo imaging for plantings and hardscapes, easy to use CAD for landscapers, professional proposals for landscaping customers, night and holiday lighting for outdoors and landscapes, and 3D rendering for landscapes.

## Standard Features

### Onsite

- Eliminate the time lag between the initial meeting and presenting a design. PRO Landscape is so easy you can design, bid and close all in a single meeting.

### Renovations

- Use powerful cloning tools to cover up existing landscaping and start fresh.

### Commercial

- PRO Landscape contains the tools to design any project, regardless of size or scope.

### Irrigation

- Use automatic sprinkler layout tools to create detailed irrigation designs with ease, including valves and sprinkler pipes by zone. Bid or print an irrigation-only plan from a complete landscape design project.

### Water Features

- Add to your designs with images of pools, ponds, waterfalls, fountains and more. PRO Landscape includes hundreds of items, or add your own at any time!

### Sustainable/Tropical

- The extensive plant library makes for the perfect design solution for drought tolerant, desert, tropical, and even sustainable landscape designs.

### Garden Centers

- Set up a design station and create designs for your customers right inside your garden center. Fill your designs with in-stock materials, quickly generate a bid and close the sale right on the spot.

### Hardscapes

- Give your customers the design they want with an array of hardscape tools that create just the right look for pavers, walls, boulders and curbing.

### Outdoor Living

- Design the ultimate outdoor living space with kitchens, BBQ grills, fire pits, gazebos, pergolas and much more.

### Photo Imaging

- Visually communicate design ideas to your customers using pictures of their own house.
- Includes the industry's largest and highest quality image library. Choose from over 10,000 images or easily add your own.
- Library includes plants by climate zone, hardscapes, water features, outdoor living items and more.
- Cover up existing landscape using advanced, yet simple, cloning tools.
- Sophisticated perspective tools easily add hard scapes.
- Interactively show plant growth from install size through maturity.

## Easiest-to-Use CAD

- Create accurate site plans with CAD built specifically for landscape design.
- No technical terms to learn - uses landscape terminology.
- Create and print precise drawings in any size or scale.
- Intelligent, customizable symbols are pre-linked to the photo imaging library.
- Start quickly with a CAD or PDF file, survey/plot plan or photo imaging design.
- Design residential and commercial projects including irrigation, hardscapes, water features, and outdoor living spaces.

## Computer Requirements

- Intel, AMD, or equivalent processor (32 or 64-bit)
- Microsoft® Windows® XP/Vista/Windows 7/Windows 8
- 2 GB RAM Minimum (4 GB RAM or higher recommended)
- 1024x768, 16M colors or higher video
- DVD drive
- Sound card for multimedia tutorials
- Mouse, pen tablet, or other pointing device recommended
- 6 GB of available hard disk space
