

Advanced Manufacturing Technology Competition Equipment Offer

For the 28th year in a row, Intelitek is organizing the Advanced Manufacturing Technology competition as a partner at the SkillsUSA National Leadership & Skills Competition

Every year we send sets of equipment to the competition and at the end of the week we have lightly used equipment that is available for purchase to teams or schools that can use them either as part of the team training or as part of their classroom curriculum for manufacturing skills. This is an incredible opportunity to purchase the equipment at a discounted price and add it to your Intelitek classroom or start a new program. We can add curriculum and LMS licenses as needed.

Take advantage of this opportunity to save now!
